

9000 SERIES DIGITAL MATRIX MIXER/AMPLIFIERS:

One for all. And all in one.

The new 9000 Series setup software gives you instant access to key parameters including module selection, volume control, parametric equalizers, matrix routing and more!

With TOA's award-winning 9000 Series, everything you need is in the box. Matrix mixer, parametric EQs, single or dual amplifiers and features galore—all at a price point you won't believe! It's ideal for all kinds of everyday installations including conference rooms, restaurants, retail shops, schools, hospitals and fitness clubs.

FEATURES INCLUDE:

- Modular matrix mixer (8x8)
- Built-in digital signal processing
- Single or dual power amplifiers (or mixer-only)
- 10-band parametric EQ on each input and output
- Telephone zone paging
- Automatic mic mixing
- Ambient noise control
- Versatile remote control options

Configure the unit from the front panel or with the all-new setup software. Either way, you'll complete the installation in record time! And just as you would expect from TOA, they sound great, and they're built to survive all kinds of abuse, backed with a five year warranty.

TOA Zone Manager remote panel with memory recall and volume control.
