

NOW YOU SEE IT.

NOW YOU DON'T.

**FINALLY. AN ELEGANT SOLUTION TO A PERPETUAL PROBLEM:
"WHERE DO I HIDE THE SUBWOOFER?"**

OUR NEW HB-1 DROPS RIGHT IN between standard 16 inch-on-center wall studs or ceiling joists, and requires just 3.5 inches of depth. Designed to handle up to 240W of continuous power, it features a paintable grille, plus a solid, vibration-free steel enclosure that's tuned and ported for optimum bass performance. Check it out, along with our other interior-enhancing H Series speakers, at www.toaelectronics.com
