

9000 series

mixer + DSP + dual amplifiers = 9000

NEW! 9000 Series Features

- All-in-one modular mixer + DSP + dual 70V amplifiers
- Three models: A-9060DH (2x60W), A-9120DH (2x120W) and M-9000 (mixer)
- Built-in digital signal processor including 10 band parametric EQ, compressor, and multi-level ducking
- Four new modules: D-001T (dual mic/line input w/DSP), T-001T (dual line output w/DSP), ZP-001T (telephone zone paging) and C-001T (control I/O)
- Configurable for up to eight mic/line inputs and six line outputs (plus two amplifier outputs)
- Five year warranty... and much more!

MODULAR...POWERFUL...RELIABLE....AND NOW, DIGITAL! With the new **TOA 9000 Series Digital Mixer/Amplifiers**, integrated technology has never been smarter. TOA engineers have redefined the mixer/amplifier category with an all-in-one compact modular mixer, digital signal processor (DSP) and dual channel amplifier. Built with the same quality and reliability as our legendary **900 Series** and ideal for everything from small jobs to complex multi-zone paging systems.

New to the world of DSP? No problem! The 9000 Series built-in digital signal processor is easy to setup with features like ten band parametric EQ, compressor, multi-level ducking and more. And no need to boot up your laptop — the cool blue front panel digital display gives you fast access to all the parameters. Custom configurations are a breeze with the modular mixer and four new modules including dual mic/line input, dual line output, telephone zone paging and programmable control. And the all-new advanced amplifier circuitry featuring ultra-low distortion (0.0008% THD) and transformerless 70 volt outputs, your system designs will sound better than ever!
