WHETHER YOU'RE UPGRADING, EXPANDING, OR STARTING FROM SCRATCH, OUR VS-900 makes it easy to integrate a *complete* security intercom into your access control and surveillance system. The VS-900 is scalable to 64 master stations and 1024 sub-stations, uses RS-232 protocol for easy integration, and supports standard single-line caller ID phones to keep system costs down. It includes all the features you'd expect, plus you can add our new "Site Connector" interface to expand the system using off-the-shelf fiber optic communications. Best of all, the VS-900 is built with all the rugged reliability you've come to expect from TOA. Call today for details, or visit: www.toaelectronics.com.
