

**INTRODUCING THE VS-900 SECURITY INTERCOM SYSTEM  
WITH REMOTE CALL FORWARDING. AAAAH, YES...**

*The VS-900 Intercom System can be expanded to 1024 substations using up to 16 exchanges.*

NO SECURITY SYSTEM IS REALLY SECURE UNLESS IT INCLUDES AUDIO. Our VS-900 makes it easy to integrate a *complete* security intercom into your existing access control and surveillance system. The VS-900 features RS-232 protocol, remote system management, support for standard, low cost, single-line, caller ID phones, data logging, plus automatic call forwarding to cell phones—so your staff will *never* miss a call, no matter *where* their rounds take them.
