SPEAKER SYSTEM

One of the most difficult speaker requirements to satisfy is a cost-effective mid-size speaker system that offers high quality sound no matter what the application. TOA HS-Series speakers are equipped with narrow-directivity control (90° horizontal × 40° vertical). This useful feature allows tailoring the speaker's dispersion characteristics to better suit the acoustic environment in which it is installed. The versatile HS-Series is compatible for use with 100V/70V lines for distributed applications. The HS-Series speakers are exceptional in offering useful features at an attractive price.

Key features

- 12" LF speaker
- Well-controlled sound coverage: 90° horizontal x 40° vertical
- High impedance version
- Easy to carry and easy to install, with handle for easy transportability
- Twin input terminal connections (Speakon® and screw terminals) for fixed and mobile installation
- Size and weight have been reduced thanks to the use of the array tweeter
- Can be used as a floor monitor
