S4.04-HD-AM RM4

TRANTEC S4.04 HANDHELD MIC WIRELESS

The TOA's TRANTEC S4.04 series Wireless Microphone system is designed for use on the UHF frequency band, and suitable for vocal or speech reinforcement applications. It features a compander circuit which minimizes the influence of ambient noise. S4.04-HD includes a wireless handheld microphone and a diversity receiver.

Key features

- Up to 4 simultaneous channels
- Fully synthesized PLL quartz tuning technology
- IR Sync - Infra-red auto channel setup
- Approx. 100m operating range (line of sight)

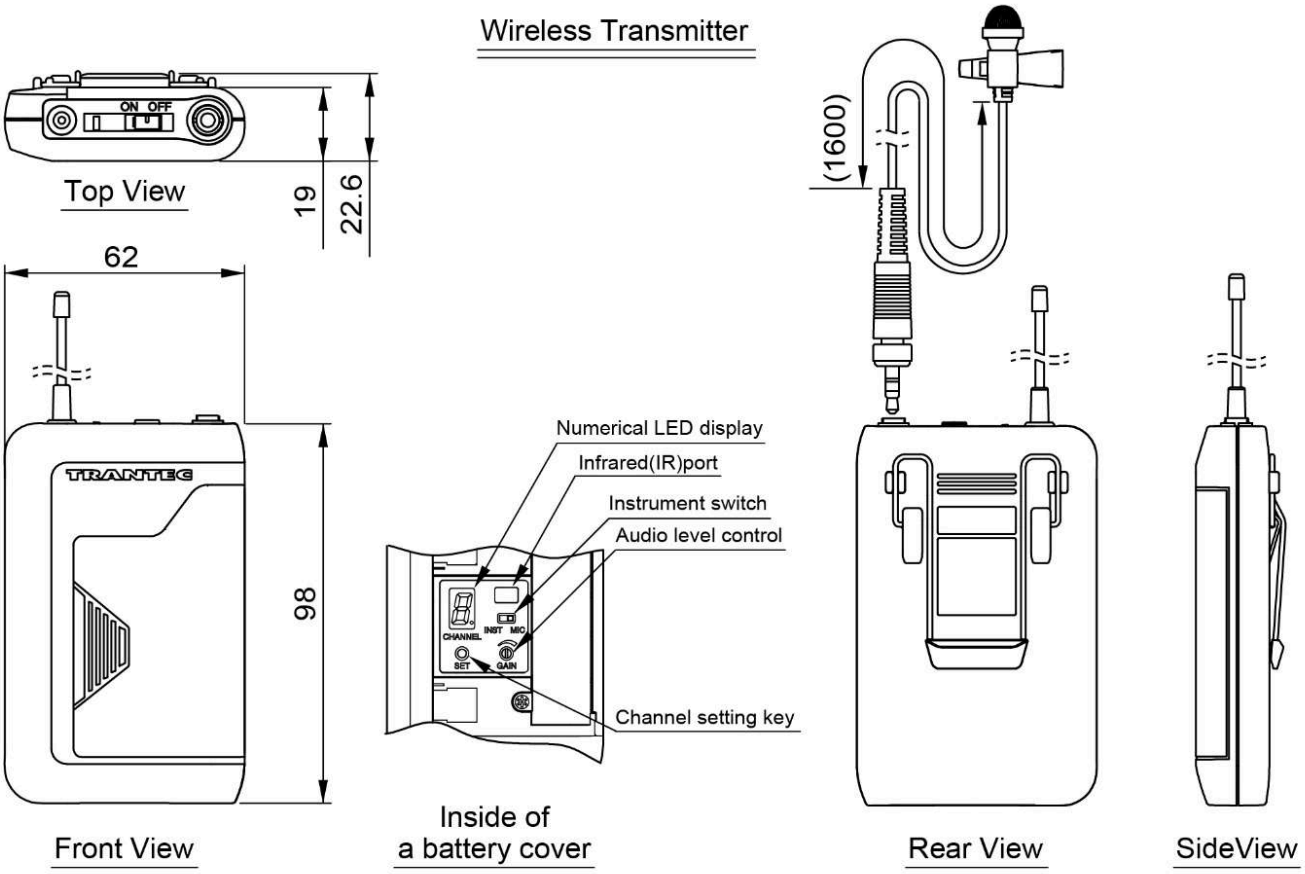

Specifications

System Components	Handheld wireless microphone x 1, Tuner x 1
Frequency Range	506 - 538 MHz, UHF
Channel Selectable	4 channels
Tunable Frequency	25 kHz Steps
Pilot tone	32.768kHz
Total Harmonic Distortion	less than 1% @1kHz
Function	IR sync, Channel scan, Battery life information
Included Accessories	AC Adapter* x 1, Microphone holder W5/16” x 1

*R(US) version: 120 V AC, 50 Hz
